</table>
| L    | 1         | Appoint a senior manager at the Institute to lead Open Science approaches (OSIL) | - Horizon scanning  
- Community Engagement  
- Named Person (Point of contact)  
- Intranet/website OS content management  
- Chair of Institutional Working Group on Open Science | ORION-PD / RIC | Short |
| L    | 2         | Establish a Working Group on Open Science (WGOS) | - Write terms of reference  
- Find volunteers from all career stages and facilities/departments | WM & Comms (website) / RIC (intranet) / OSIL | Short |
| L    | 3         | Establish a dedicated site in the intranet and website for open science | - Define location  
- Upload ORION open science resources (Educational Resources and this action plan)  
- Manage and maintain content | WM & Comms (website) / RIC (intranet) / OSIL | Short |
| C    | 4         | Publish a statement on OS (public facing version of BI OS vision and mission) in intranet and website | - Define successful open science at the Institute (vision and mission)  
- Summarise BI OS V&M for external audiences  
- Upload in intranet and website | WGOS / OSIL (intranet) / WM (website) | Medium |

</thead>
</table>
| C    | 5      | Establish advocacy programme to encourage uptake of open science practices | **ORION EVIDENCE:**
- ‘Self-assessment survey on OS views and practices’ (T2.1)
- ‘Finalised data from self-assessment of partner RFPOs’ (D2.2)
- ‘Analysis of knowledge and practice about Open Science and RRI’ (D2.5) | **KPIs:**
- Annual number of external speakers invited
- Annual number of talks / seminars
- Volume of research data published in BI storage solutions (expected to rise)
- Use of researchers and datasets persistent identifiers (ORCID / PID) | Medium |
| L    | 6      | Develop Institutional Open Data and Research Data Management policies aiming at embracing the FAIR principles (findable, accessible, interoperable and re-usable) for all Institute research outputs | **LINKED TO:**
- Intellectual Property Policy (BI-KEC-001)
- BI Research integrity Policy
- Identify existing barriers and resources needed (e.g. data storage options, software such as to support electronic lab notebooks)
- Monitor the implementation and uptake of such policies
- Include Terms of Reference for metadata (descriptive data about data)
- Ensure researchers understand which are BI storage solutions to support that research data is available for sharing and reuse
- Terms of reference for engagement with the EOSC | **KPIs:**
- RDM and OD policies exist
- Number and profile of visitors to the policies
- RDM working group exists
- Publication of BI guidelines on RDM and open data
- Use of external repositories by BI researchers
- Number of open (and FAIR) research outputs (protocols, | Short |
| ORION: Open Responsible research and Innovation to further Outstanding kNowledge | software, datasets, code, electronic lab notebooks, negative results, etc | - Use of BI core facilities (expected to grow after publishing RDM policy). Measure this value on a regular basis.
- Volume of research data (number of datasets) published in BI storage solutions (in reference to storage capacity).
- Number of metadata sets published in BI storage solutions (should equal number of available datasets)
- Number of Electronic Lab Notebook users at BI
- BI investment in (income dedicated to) RDM (e.g. Creation of new job profiles or institutional services dedicated to RMD)
- Number of training courses provided or mediated by BI on RDM and open data + number of researchers engaged |
| S | 7 | Develop evaluation, recognition and career development frameworks and policies that supports Open Science practices at the Institute |

**ORION EVIDENCE:**
- ‘Finalised data from self-assessment of partner RFPOs’ (D2.2)
- ‘Analysis of knowledge and practice about Open Science and RRI’ (D2.5)

**LINKED TO:**
- ‘Evaluation of Research Careers fully Acknowledging Open Science Practices’ (EC; 2017b)

| | | - Institutional research assessment processes should embody the two principles set in DORA²:
  1. Be explicit about the criteria used to evaluate scientific productivity, and clearly highlight that the scientific content of a paper is more important than publication metrics or the identity of the journal in which it is published
  2. Recognise the value of all relevant research outputs (for example publications, datasets and software), as well as other types of contributions, |

| | | - Volume of researchers engagement with RMD policy and practices per ISP
- Number of persistent identifiers (PID) for published datasets and researchers identifiers (ORCID)
- Number of RDM plans created and published
- Number of datasets deleted or withdrawn
- Existence of a catalogue of where researchers have published data (or stored if not available)

| | | - GC&GST / HR / GL / HoSF KPIs: |
- Use of the institutional catalogue of where researchers have published data (or stored if not available) to assess or evaluate researchers and their outputs
- Open Science skills training is fully embedded in Students Log |

<p>| | | Long |</p>

<thead>
<tr>
<th>L</th>
<th>8</th>
<th>Align the public engagement strategy and programme with the Institute’s open</th>
</tr>
</thead>
<tbody>
<tr>
<td>- The Open Science Career Assessment Matrix (OS-CAM), proposed by the EU Working Group on Open Science Rewards (O’Carroll, 2017: 15-17)</td>
<td>such as training early-career researchers and influencing policy and practice.</td>
<td></td>
</tr>
<tr>
<td>- Develop roadmap or activity to ‘operationalise’ the DORA principles into good practice.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Identify mechanisms at the Institute to record and acknowledge Open Science training so that one can demonstrate competencies as part of career development, appraisals and promotions</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Seek ways for Open Science practices to be acknowledged in professional development and career progression of all staff (e.g. Embed Open Science principles in the Institute’s research assessment and appraisal system)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Provide proper guidance or training to those who are involved in appraisal and promotions</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Periodically monitor, reflect and update research assessment so it remains fit-for-purpose and in line with open research</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Existence of clear and transparent criteria used for recruitment, promotion and other career development decisions that recognise the value of all relevant research outputs and contributions (E.g. training, policy-making, public engagement)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Publication of guidelines on how to incorporate and assess open science practices for those who are involved in appraisal and promotions (E.g. open research outputs, altmetrics, citations, replicative experiments, re-use of datasets, peer review activities, mentoring/supervision, public engagement, knowledge exchange, etc)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>- Provision of training course on research assessment for managers, group leaders and senior researchers (optional for all other staff)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

ORION: Open Responsible research and Innovation to further Outstanding kNowledge
|   | science vision and mission (where relevant) | - Integrate citizen science in PE strategic goals  
- Name an institutional point of contact for Citizen Science  
- Develop a Citizen Science advocacy programme. Topics to cover:  
  - Benefits & challenges  
  - Existing support  
  - Expectations & other considerations (commitment for infrastructures and data repositories)  
  - Criteria for successful Cit-sci projects based on funders requirements  
  - Guidelines on ethical, legal and privacy considerations for Cit-Sci projects | KPIs:  
- Reference to BI open science position in new PE strategy  
- Inclusion of Citizen Science in new PE strategy  
- Easily available information on institutional point of contact for citizen science initiatives and enquiries  
- Published guidelines on citizen science (based on the CitSci advocacy programme)  
- Number of citizen science project proposals submitted for external funding  
- Number of citizen science project successful proposals |
|---|---|---|
| 5 | 9 | Develop a strategic approach to skills training at the Institute integrating open science concepts and their practical applications  
**ORION EVIDENCE:**  
- ‘Finalised data from self-assessment of partner RFPOs’ (D2.2)  
- ‘Analysis of knowledge and practice about Open Science and RRI’ (D2.5)  
- Final evaluation report on trainings (D5.5) | - Determine long-term strategy to resource Open Science skills training  
- Provide appropriate support, professional development and training opportunities for Open Science, tailored to employees’ different needs (role* and seniority, career progression, goals)  
* Scientists at all career stages, research managers, data scientists and stewards, copyright/knowledge exchange officers, etc. | - GC&GST / HR / OSIL  
**KPIs:**  
- Inclusion of open science module in students inductions  
- Development of a catalogue of open science skill trainings available to BI scientists  
- Existence of institutional incentives (E.g. bursaries for external courses on open |

ORION: Open Responsible research and Innovation to further Outstanding kNowledge
| S  | 10  | Recognise open science practices in hiring processes and policies | Include information on Open Science and how the Institute aligns with it in student inductions  
- Open Science specific skills trainings to consider:  
  - Scholarly publishing  
  - Research Data Management  
  - Research Integrity and Ethics  
  - Citizens Science  
  - Collaborating and networking  
  - Assessing the impact of initiatives in public  
  - Narrative CVs  
Science skills) and support (e.g. catalogue of available courses at BI and other organisations) for open science skills development  
- Monitor take-up of OS training and impact (E.g. annual survey open science practices)  
- HR to familiarise with the OSF [Modular Certification Initiative](https://osf.io/modularc/) for Recognising Open Research Practices in Hiring Policies for institutional staff positions that involve research  
- Familiarise with Wellcome [recommendations](https://wellcome.org/research-open-science) on FAIR and responsible hiring processes in line with the principles set in DORA  
- Provide proper guidance or training to those who are involved in staff recruitment  
- HR / GL / Staff with managerial responsibilities  
**KPIs:**  
- Publication of guidelines on how to assess open science practices for those who are involved in research staff recruitment  
- Number of mentions to open research practices (E.g. Open data, open code/software, open educational resources, pre-registrations, open access publications, preprints) in advertised research job descriptions |
| - Number of mentions to open research practices as desirable characteristic in advertised research job descriptions  
- Number of requests for narrative CVs in application processes  
- Existence of clear and transparent criteria used for recruitment, promotion and other career development decisions that recognise the value of all relevant research outputs and contributions (E.g. training, policy-making, public engagement)  
- Publication of guidelines on how to assess open science practices for those who are involved in recruitment and promotion decisions (discouraging the use of proxy indicators and encouraging to weight in the use of open science practices and other contributions)  
- Absence of (direct or indirect) references in job advertisements to journal title use as a proxy for quality |
